Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Patent Number 4,687,090 by Ramseier. The coin guide arrangement disclosed by the '090 patent incorporates track 1, inclined guide surface 5 and baffle surface 8 that read on the Applicant's slot chamber, offset coin channel and shoulder/reflector, respectively. Although said '090 patent fails to specifically disclose a front plate, the incorporation of a plate into a coin processing apparatus to form a coin insert slot is well known in the art. Accordingly, it would have been obvious to one of ordinary skill in the art at the time of the invention to incorporate a front plate into the coin guide arrangement of the '090 patent to provide an effective coin insertion slot.

Allowable Subject Matter

Claims 9-16 are allowed. Claims 3-6 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The following prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Patent Number 5,139,128 by Carmen et al because of its token rebound wall 88,
and

European Patent Application Publication Number EP-0.042.662-A1 published 30
December 1981 because of its impact face 12.
